

**REMARKS**

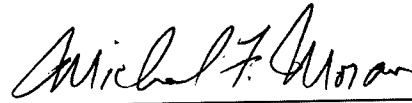

In the Notice of Allowance mailed on August 1, 2008, the Examiner states that claim 1 recites "a ratio of horizontal to vertical of each pixel is substantially equal to 2:3 as shown in Fig. 15". The Examiner also states that claim 8 recites "red, blue and green pixels are sequentially arranged in a row direction, the red and the green pixels are alternately arranged in a column direction, the blue pixels are repeatedly arranged in the column direction, four red and green pixels surrounding adjacent two blue pixels in neighboring two pixel rows face each other, and a ratio of horizontal to vertical of each pixel is equal to 2:3 as shown in Fig. 14 and Fig. 15".

Applicants submit that the scope of the claims is not necessarily limited to what is shown in Figs. 14 and 15.

The Examiner also amended the title of the invention from "Liquid Crystal Display" to "Liquid Crystal Display Having Particular Pixel Electrodes". As an alternative to the Examiner's amendment, Applicants respectfully request that the title of the invention be amended to read "Liquid-Crystal Display Having A Particular Ratio Of Horizontal To Vertical For Each Pixel", which clearly indicates the invention to which the claims are directed. See M.P.E.P § 606.01.

An early and favorable reconsideration is earnestly solicited.

Respectfully submitted,

A handwritten signature in black ink, reading "Michael F. Morano", written over a horizontal line.
